

## Joshua Everett Artist Statement

*I am an artist from Australia's capital city with an immense passion for life and a drive to explore, discover, and learn as much as possible, for as long as I am able. I love and have a passion for every avenue of artistic exploration, with acting and creating residing at the crux of my artistic interests. I have trained in Acting at the Western Australian Academy of Performing Arts for four years, achieving a diploma and bachelor in the field. I find excitement in being able to explore the world from every perspective as well as the minds that inform those perspectives. The majority of my endeavours have been around theatre, writing, and creative development, with film, music and movement also playing a monumental role in what fills me with joy. I am still fuelled by a childlike joy and wonder and strive to keep that sense alive as I endeavour to constantly find the play in everyday life. I am obsessed with nature, so if I am not in a theatre or on a film set I will be travelling and exploring every inch of this beautiful world. I can't get enough of what I do and cannot wait to spend the rest of my life loving the process of growing as a human being and an artist.*
